DETAILED ACTION

1. According to paper filed on July 10, 2008, the applicants have canceled claims 1-22 and furthermore, have added new claims 23-37. The applicants have also submitted a new abstract.
2. Claims 23-37 are pending in the application.

Response to Arguments

3. Applicant's arguments filed on July 10, 2008 have been fully considered but they are not persuasive regarding enablement rejection for method of treatment. The examiner does not agree with the applicants arguments that the specification is enabling for treating every known pathology associated with the constriction of smooth muscle cells. Based on the teachings in the instant specification, it is enabling only for treating arterial hypertension and not any other disorder. The applicants have not provided any evidence that compounds known to treat arterial hypertension are also well known to have therapeutic utility for treating asthma or vice versa.

Conclusion

4. The enablement rejection of claims 23-33 under 35 U.S.C. 112, first paragraph is maintained for the reasons of record.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

6. Claims 23-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claim 23, the values of variables R7-R10, the term ---- comprising ----- is indefinite since it is not clear whether these variables actually represent halogen or some other unknown group having halogen embedded somewhere.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired.

See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 23 recites the broad recitation alkyl group for variable R5, and the claim also recites butyl group which is the narrower statement of the range/limitation.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
